History

The *Fundamentals, Real Problems and Computers ISSN* was founded in 1984 by a group of computer scientists who were interested in publishing research on the foundations of computer science and information technology. The journal's first editor-in-chief was Professor David Gries of

Cornell University. The journal has been published continuously since its founding and has published over 1,000 articles.

Purpose

The purpose of the *Fundamentals, Real Problems and Computers ISSN* is to publish original research on the foundations of computer science and information technology. The journal seeks to publish articles that make significant contributions to the field and that are of interest to a broad audience of computer scientists and information technology professionals.

Scope

The *Fundamentals, Real Problems and Computers ISSN* publishes articles on all aspects of the foundations of computer science and information technology. The journal's scope includes, but is not limited to, the following topics:

- Algorithms
- Complexity theory
- Data structures
- Formal methods
- Logic in computer science
- Operating systems
- Programming languages
- Software engineering
- Theoretical computer science

Types of Articles Published

The *Fundamentals, Real Problems and Computers ISSN* publishes three types of articles:

- **Regular articles** are full-length research papers that report on original research findings.
- **Short articles** are shorter research papers that report on preliminary research findings or that present new ideas.
- **Surveys** are comprehensive reviews of the literature on a particular topic.

Submission Process

Authors who wish to submit an article to the *Fundamentals, Real Problems and Computers ISSN* should follow the journal's submission guidelines. The submission guidelines are available on the journal's website.

Articles submitted to the journal are peer-reviewed by a panel of experts in the field. The peer-review process is designed to ensure that the journal publishes only high-quality articles that make significant contributions to the field.

The *Fundamentals, Real Problems and Computers ISSN* is a leading academic journal that publishes original research on the foundations of computer science and information technology. The journal's articles are of interest to a broad audience of computer scientists and information technology professionals.
