Varma, who passed away in 2020, was a distinguished professor of mathematics at the University of Maryland, College Park. He made significant contributions to several areas of mathematics, including mathematical analysis, differential equations, and mathematical physics.

His research was highly influential, and he published over 100 papers in top academic journals.

In addition to his research, Varma was also a passionate and dedicated educator. He taught generations of students at the University of Maryland and was known for his clear and engaging lectures. He also served as a mentor to many young mathematicians, helping them to develop their careers.

The essays in *In Memory of Varma* provide a glimpse into the many facets of Varma's life and work. Colleagues share their memories of his brilliance and his dedication to mathematics. Students recall his inspiring teaching and his ability to make complex concepts clear. Family members offer personal insights into his life outside of academia.

One of the most striking things that emerges from the essays is Varma's deep love of mathematics. He saw mathematics as a beautiful and elegant subject, and he was always eager to share his passion with others. He believed that mathematics could be used to solve important problems in the world, and he was committed to using his knowledge to make a difference.

*In Memory of Varma* is more than just a tribute to a great mathematician. It is also a celebration of the power of mathematics to inspire and to change lives. Varma's legacy will live on through his students, his colleagues, and the many people who have been touched by his work.
