

Is Black Ice My Father?

Black Ice is a term used to describe people of mixed African and European descent. The term was first used in the early 1900s, and it has since been used to describe a wide range of people, from those who are barely visibly black to those who are almost completely white.

There are many reasons why someone might have Black Ice in their family tree. One reason is that, during the era of slavery, many white men raped black women. The children of these rapes were often born into slavery, and they were often given the surname of their father. This is why many African Americans have European surnames.

Another reason why someone might have Black Ice in their family tree is that, after the Civil War, many black men married white women. The children of these marriages were often born into a world of racism and discrimination. They were often forced to pass as white, and they often had to deny their African heritage.
