With Sami's guidance, you'll learn how to:

- Identify and assess workplace hazards
- Develop and implement effective safety programs
- Train and supervise employees on safety procedures
- Investigate accidents and incidents

- Create a culture of safety in the workplace

This book is an essential resource for supervisors at all levels, providing them with the knowledge and skills they need to keep their teams safe and productive.

## **Chapter 1: The Importance of Supervisor Safety**

In this chapter, you'll learn why supervisor safety is so important and the benefits of creating a safe workplace.

- The role of supervisors in workplace safety
- The costs of workplace accidents
- The benefits of a safe workplace

## **Chapter 2: Identifying and Assessing Workplace Hazards**

In this chapter, you'll learn how to identify and assess workplace hazards, including physical hazards, chemical hazards, and biological hazards.

- Types of workplace hazards
- How to identify workplace hazards
- How to assess workplace hazards

**System Concepts**

**5 steps to risk assessment**

**Step 1: Identify hazards**

**Identifying hazards means taking some time to think about what might harm people at work. You can identify hazards by:**

1. **Thinking about the tasks employees carry out** such as using computers, working at height, driving, manual handling, operating, travelling, maintenance, repetitive tasks, or working at the end of a shift.
2. **Inspecting your workplace to look for hazards** such as lack of space or unobstructed layout, stairs, wet floors, inadequate lighting, lack of ventilation, inadequate safety facilities, weak or equipment that is in a poor state of repair.
3. **Looking at the items that people use** like machinery, IT/network, office equipment, complex systems and computers, ladders and tools, machinery, lifting, cooking facilities and chemicals.
4. **Considering hazards you cannot typically see** such as poor working practices or procedures, stress, long hours, shift or other working hours, or other working hours, such as shift, night or other working hours. Hazards such as biological as well as gas, electricity and noise.
5. **Speaking with people who do the work** (see 2.1) to find out the hazards they see or face or problems they have.

**Points to Remember:**

1. **Reviewing sources of information** such as legislation, industry guidance, your workplace accident and ill health data, management information, and physical data sheets.
2. **Use a competent person** to carry out your risk assessment. It is essential that they are trained to do this job in your business.
3. **You only need to identify hazards which are significant** (see 2.1) reasonably be expected to know about, and which are relevant hazards which are part of everyday life, are not associated with your work, or are insignificant. The procedure doesn't form part of a good practice plan.

### Chapter 3: Developing and Implementing Effective Safety Programs

In this chapter, you'll learn how to develop and implement effective safety programs, including safety policies, procedures, and training programs.

- Elements of an effective safety program
- How to develop a safety policy

- How to develop safety procedures
- How to develop a safety training program

## **Chapter 4: Training and Supervising Employees on Safety Procedures**

In this chapter, you'll learn how to train and supervise employees on safety procedures, including how to conduct safety training, how to supervise employees on the job, and how to provide feedback and reinforcement.

- How to conduct safety training
- How to supervise employees on the job
- How to provide feedback and reinforcement

## **Chapter 5: Investigating Accidents and Incidents**

In this chapter, you'll learn how to investigate accidents and incidents, including how to gather evidence, how to interview witnesses, and how to write an accident report.

- How to gather evidence
- How to interview witnesses
- How to write an accident report

## **Chapter 6: Creating a Culture of Safety in the Workplace**

In this chapter, you'll learn how to create a culture of safety in the workplace, including how to involve employees in safety, how to communicate about safety, and how to reward safe behavior.

- How to involve employees in safety
- How to communicate about safety
- How to reward safe behavior

Sami the Safety Sumo's to Supervisor Safety is an essential resource for supervisors at all levels. With Sami's guidance, you'll learn how to create a safe and productive workplace for your team.
